# lares 4.0

**THE MOST INNOVATIVE IoT SOLUTION FOR SECURITY AND HOME & BUILDING AUTOMATION**

# DATASHEET

The new lares 4.0 represent by far the most advanced and reliable Solution in the Digital Revolution (IoT) for what concern

both the Security (Intrusion, Video-surveillance, Access Control) and the Home & Building Automation.

They can manage a number of outputs equal to the number of inputs (sensors) in order to manage lights, clima, irrigation, Automatic Doors and Windows, in short any type of Automation or Appliances: on top of all Security aspects mentioned before, even the SMART HOME or SMART BUILDING Features can be now managed by a single User APP (lares 4.0) and programmed from the Installer now even from any mobile terminal (APP named Ksenia Pro).

Regardless from its dimension, the Control Panel Mother Board is having a native Ethernet Port as well as the on board Wireless Transceiver (868 MHz Bi-directional) compatible with all existing wireless Ksenia's Peripherals; The Control Panels are also equipped with a Double BUS and detachable Connectors. All Mother Boards are designed to take directly onboard (with no need of having a Communication Bus so as to enhance the transit speed of all Data) both the 3G Module (and soon the 4G-LTE) and, where required, the PSTN Module. In any case is guaranteed the transmission of Voice Messages, email, Contact ID and SIA DC-09 Level III Protocol to the CMS (Central Monitoring Stations).

The Installer APP enables also the Centralization and Geo-localization of all Panels installed and therefore to offer the outmost in terms of Maintenance & Service by means of Push Notifications even for tech. Alerts (valid for all IoT Panels: lares 4.0 and lares wls).

*The lares 4.0 Platform has been developed and manufactured with unprecedented characteristics of power, calculation speed and capacity of memory calculation (even compared to the traditional lares, already superior to many competitors) as specified in the table below:*

	lares	lares wls	lares 4.0
Flash memory (spazio codice)	512 KB	2 MB	4 MB
RAM	96 KB	512 KB	512 KB
CPU Clock	80 MHz	120 MHz	240 MHz
Drystone MIPS (Mln. Instr. per sec.)	132	240	480
NAND data memory	8 MB	16 MB	32 MB
NOR data memory (eMMC)	-	4 GB	4 GB
SD card slot	no	si	si

## lares 4.0

3G Module micro SIM.

PSTN Module.

auxi expansion module with 5 input/output programmable.

auxi relè expansion module with 5 relay output programmable

Switching Power Supply 15 Vdc - 50 W

## APP lares 4.0

Thanks to this new App the USER EXPERIENCE is really fantastic: very direct and easy to use, a comprehensive Home or Building Surveillance.

A single APP in fact allows to monitor all Security Aspects (Intrusion, VideoSorveglianza, Access Control) and simultaneously to manage Home Automation or BMS (Building Management System).

'MAXIMUM FREEDOM and CREATIVITY': for the first time the User himself, without asking to his Installer, can not only choose but even set-up the domotic scenario he wants and manages it even from remote in the way he likes. Similarly the User can determine which kind of Push Notification he wishes to receive on his smartphones or tablet.

## ENVIROMENTAL RESPECT

lares 4.0 series has been designed and realized with the following characteristics to reduce its environmental care:

- Halogen free laminates and lead-free PCBA
- Low consumption
- Packaging realized mainly with recycled fibers and materials
