INTRODUCTION

unum wireless, is a digital Dual-Optic Motion Detector available in 2 versions, with and without Pet Immunity The Motion sensor is a dual PIR Digi Pyro™ with high Quality EvenEye™ Lens. Thanks to the Bi-Directional wls Technology, the range selection (6 or 12 m.) and the number of impulses programmable directly from the basis software with no need of selecting jumpers or annoying dipswitches; furthermore it's possible to modify the configuration with no need to re-open it.

Additionally it is possible to deactivate the PIR sensor when the system is disarmed (default setting) so as to reduce drastically the current consumption with consequent increase of the battery life. Instead, with particular reference to Home-Automation applications, it is possible to program the PIR sensor to be always powered.
