OPERATION

- ## MAKING A CALL

  i. ### USING A HANDSET/SPEAKERPHONE
     Go Off-hook and hear the dial tone. Dial the desired telephone number. When the called party answers, begin the conversation. After the conversation hang up

  ii. ### USING PRE-DIALING
      In On-hook state, enter the number to be dialed (Use Del key to correct any input mistake). Go Off-hook and the number will be dialed out directly within 3 seconds.

USING CALL BACK

Select the Incoming/Outgoing number. Press "Redial" and the number will be dialed out. When the called party answers, begin the conversation.

- ## PRE-DIAL

  At on-Hook mode, use number button to input the number you want to dial out, and use "DEL" button to modify it. After finishing the input, press "REDIAL" or "SPEAKERPHONE" button or pick up the handle for dialing out.

- ## REDIAL

  Go Off-hook and press the "Redial" key. The last dialed number will be dialed automatically.

- ## FLASH

  Flash is designed for disconnecting telephone line during the pause. After pressing FLASH, dialer will send one flash signal to disconnected telephone lines for flash time.

- ## HOLD

  In off hook mode, enter the HOLD mode by pressing "HOLD" button and you will hear the music. Now, hang up the phone.
  - **a)** When you pick up the handset again, the music will stop and return to the handset mode.
  - **b)** Press "HOLD" again, the music will stop and return back to the original mode.
  - **c)** In On-hook state, press "Hands free" key. The music will stop and return back to the hands-free mode.

- ## DEL

  Pressing DEL key can exit the operation.
  - **a.** In pre-dialing mode, press DEL key to delete or modify a wrong number.
  - **b.** While checking the incoming/outgoing calls, press DEL key to delete the number displayed on the LCD.
  - **c.** Press DEL key for 3 seconds to delete all the incoming or outgoing calls.

- ## OUT

  Out key is used to view the outgoing calls made through the phone.
